PROFESSIONAL SUMMARY

Entry-level AI engineer and software engineer with experience building **Python** LLM workflows, RAG/search systems, AI-powered applications, APIs, and full-stack integrations. Background spans **OpenAI API**, **Gemini API**, **Mistral AI**, **LangChain**, **RAG**, **semantic search**, **vector retrieval**, **React/Next.js**, **Node.js**, **Docker**, and **Git**, with emphasis on grounded AI outputs and user-facing product workflows.

EDUCATION

Bowling Green State University

Master of Science in Computer Science, GPA: 4.00/4.00

Bowling Green, OH
Aug. 2024 – Aug. 2026

Bowling Green State University

Bachelor of Science in Computer Science, GPA: 4.00/4.00

Bowling Green, OH
Jan. 2021 – Apr. 2024

EXPERIENCE

Artificial Intelligence & Computer Science Intern

SmartSolve Industries

May 2026 – Present
Bowling Green, OH

- Applied **Codex** and **Claude Code** in AI-assisted engineering workflows for planning, implementation, debugging, and self-review while validating generated output around proprietary code.
- Built secure internal software with **Next.js**, **TypeScript**, **PostgreSQL**, **Drizzle ORM**, **SSO**, and auth middleware for onboarding, org-chart, and sensitive employee-data workflows.
- Created a cross-platform **Docker** devcontainer for **WSL2/Colima**, improving reproducible setup, debugging, and developer workflow consistency for AI-assisted development.

Data Engineering Intern

American Association of Insurance Services

May 2025 – Aug. 2025
Lisle, IL

- Automated a manual **MySQL/SQL** billing workflow with **Python**, **PySpark**, and **AWS Glue**, processing **20+ TB** of production insurance data for **700+** member companies.
- Profiled **160+** **MySQL**/Oracle/Impala tables with **Python**, **Pandas**, **SQL**, and JDBC to map source-system similarities and define **25** MDM domains for cloud ETL migration.

Software Engineering Intern

American Association of Insurance Services

May 2023 – May 2024
Lisle, IL

- Engineered **Python**/JSON backend automation generating **1,000+** production **SQL** tables across **MySQL**, Oracle, and PostgreSQL, supporting standardized data models across **10+** insurance lines.
- Contributed to a **React/Node.js** modernization by implementing **RBAC** and **JWT** patterns, replacing broad employee-wide access with role-specific controls for roughly **110** internal users.
- Automated event-driven database validation with **AWS Lambda** triggers that tokenized PII using **hashlib/boto3** and ingested structured JSON into **S3**.

Software Engineering Intern

Alliance for Paired Kidney Donation

May 2022 – Aug. 2022
Toledo, OH

- Secured an **AWS-hosted Lucee/CFML** healthcare workflow platform with global **anti-CSRF** protection, IP-aware audit logging, and access-denied/404 routing across internal workflows.
- Modernized HTML5 date/time inputs, JavaScript/CSS fallbacks, upload paths, and duplicate-antigen crash handling to improve data-entry reliability for operational users.

PROJECTS

Diff-Grounded PR Generation | *Python, OpenAI API, GitHub API*: Built an LLM pipeline generating evidence-grounded PR descriptions from commits, diffs, linked issues, and metadata, with structured context construction and automated evaluation.

FalconGraph Search | *Python, Flask, OpenAI API, RAG, React, Next.js*: Built a source-grounded search prototype with document ingestion, chunking, vector retrieval, semantic search, LLM answers, and graph-based source tracing.

RocketGrader | *Angular, TypeScript, Express, MongoDB, LangChain, Mistral AI*: Built a full-stack AI feedback platform with REST APIs, role dashboards, file uploads, parsing, and structured grading workflows.

RAG Review Analysis | *Python, Sentence Transformers, ChromaDB*: Built a RAG pipeline using embeddings, vector search, semantic retrieval, NLP, and review mining to compare app feedback and maintenance patterns.

TECHNICAL SKILLS

Languages: Python, TypeScript/JavaScript, SQL, C++, C#, C, Lucee/CFML

AI, Agents & RAG: OpenAI API, Gemini API, Mistral AI, LangChain, RAG, prompt engineering, LLM inference, LLM evaluation, embeddings, vector search, semantic retrieval, ChromaDB, Sentence Transformers, Codex, Claude Code

Product, APIs & Full Stack: React, Next.js, Angular, Node.js, Express, Flask, REST APIs, Auth0, JWT, RBAC, SSO, PostgreSQL, MongoDB, Drizzle ORM

Cloud, Data & Tools: Docker, Git, Linux, AWS Glue, Lambda, S3, IAM, PySpark, Spark, Pandas, JDBC
