PROFESSIONAL SUMMARY

Graduate software engineer with healthcare workflow, AWS data engineering, and full-stack software experience across digital-health-adjacent systems, cloud ETL, secure access controls, and AI-enabled applications. Built and debugged systems with **Python, JavaScript/TypeScript, React/Next.js, Node.js, AWS Glue/S3/Lambda/IAM, PySpark, SQL, PostgreSQL, Oracle, MongoDB, and Lucee/CFML**.

EDUCATION

Bowling Green State University

Master of Science in Computer Science, GPA: 4.00/4.00

Bowling Green, OH

Aug. 2024 – Aug. 2026

Bowling Green State University

Bachelor of Science in Computer Science, GPA: 4.00/4.00

Bowling Green, OH

Jan. 2021 – Apr. 2024

EXPERIENCE

Artificial Intelligence & Computer Science Intern

SmartSolve Industries

May 2026 – Present

Bowling Green, OH

- Built a full-stack **Next.js** onboarding tracker with **PostgreSQL, Drizzle ORM, SSO**, and auth middleware, consolidating onboarding tracking and org-chart update workflows into a secured internal tool for sensitive employee data.
- Created a cross-platform **Docker** devcontainer for **WSL2/Colima**, reducing setup friction and giving internal AI-assisted engineering work a reproducible development environment.

Data Engineering Intern

American Association of Insurance Services

May 2025 – Aug. 2025

Lisle, IL

- Automated a fully manual SQL billing workflow with **Python, PySpark**, and **AWS Glue**, processing **20+ TB** of golden-table insurance data for **700+ member companies** while removing recurring manual execution.
- Profiled **Oracle/Impala** data through **JDBC** with **Python, Pandas**, and **SQL**, mapping 160+ source tables into a standardized taxonomy of 25 MDM domains for insurance data modernization.
- Replaced **160+ Pentaho jobs** with **AWS Glue ETL** and partitioned **S3** pipelines for **Semarchy MDM**, improving maintainability and standardizing insurance data across complex source systems.
- Built reverse-ETL, validation, and custom **AWS IAM** access patterns to support controlled self-service data access and **24-hour** data latency across MDM workflows.

Software Engineering Intern

American Association of Insurance Services

May 2023 – May 2024

Lisle, IL

- Generated **1,000+** production SQL tables across **Oracle/PostgreSQL** with **Python/JSON** workflows, supporting standardized insurance data models across **10+** lines of business.
- Built **Python/Pandas** data-processing workflows with multiprocessing, fuzzy matching, and hashing to clean CSV datasets used in standardizing **1,000+** production SQL tables across **10+** insurance lines.
- Implemented **RBAC** and **JWT** patterns in a **React/Node.js** modernization effort, replacing broad employee-wide access with role-specific controls for roughly **110** internal users.
- Automated database validation with **AWS Lambda** triggers that tokenized PII using **hashlib/boto3** and ingested structured JSON into **S3** for downstream standardization workflows.

Software Engineering Intern

Alliance for Paired Kidney Donation

May 2022 – Aug. 2022

Toledo, OH

- Secured an **AWS-hosted Lucee/CFML** healthcare workflow platform with global **anti-CSRF** protection, IP-aware audit logging, and access-denied/404 routing, reducing risk across form-heavy internal workflows.
- Modernized legacy date/time data-entry flows by replacing **cfinput/cfform** fields with **HTML5** inputs, themed **CSS**, JavaScript fallbacks, and form script updates to improve reliability and usability.
- Improved transplant logistics workflows by adding **4** center-level blood-tube defaults and surfacing those values on logistics sheets used by clinical operations teams.
- Triaged **4** classes of reliability issues across import ordering, MFI upload paths, duplicate-antigen page crashes, and reusable modal/tab screens to stabilize internal healthcare operations workflows.

PROJECTS

Travel Health Advisor | *React, Vite, Express, MongoDB, Mistral AI*: Built a full-stack health AI prototype combining disease-risk data, health-profile context, map-based exploration, chatbot guidance, vaccine-risk views, and downloadable checklists into one travel-health advisory workflow.

HealthTrend | *Apache NiFi, Kafka, Hadoop HDFS, Spark, Docker*: Built a Dockerized healthcare data pipeline routing batch patient records and streaming IoT health events into Spark/PySpark workflows for operational health-data analysis.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript/TypeScript, C++/C, C#, Lucee/CFML

Cloud & Data: AWS Glue, S3, Lambda, IAM, PySpark, Spark, Kafka, Hadoop HDFS, ETL, reverse ETL, data validation

Web, APIs & Auth: React, Next.js, Node.js, Express, REST APIs, SSO, JWT, RBAC, auth middleware, HTML5, CSS

Databases & Tools: PostgreSQL, Oracle, MongoDB, Mongoose, Drizzle ORM, Semarchy xDM, Docker, Git, Pandas, boto3
