PROFESSIONAL SUMMARY

Full-stack and data-focused software engineer with experience building secure internal tools, REST API platforms, cloud ETL workflows, and AI-assisted products using **Python, TypeScript, React, Next.js, Node.js, PostgreSQL, MongoDB, Docker**, and **AWS**. Background spans authentication, web security, event-driven data movement, and production workflow automation.

EDUCATION

Bowling Green State University

Master of Science in Computer Science, GPA: 4.00/4.00

Bowling Green, OH

Aug. 2024 – Aug. 2026

Bowling Green State University

Bachelor of Science in Computer Science, GPA: 4.00/4.00

Bowling Green, OH

Jan. 2021 – Apr. 2024

EXPERIENCE

Artificial Intelligence & Computer Science Intern

SmartSolve Industries

May 2026 – Present

Bowling Green, OH

- Built secure internal software with **Next.js, TypeScript, PostgreSQL, Drizzle ORM, SSO**, and auth middleware for onboarding and org-chart workflows around sensitive employee data.
- Created a cross-platform **Docker** devcontainer for **WSL2/Colima**, standardizing reproducible environments for AI-assisted development, debugging, and code review.
- Applied **Codex** and **Claude Code** to implementation planning and self-review while keeping proprietary-code isolation and human review central.

Data Engineering Intern

American Association of Insurance Services

May 2025 – Aug. 2025

Lisle, IL

- Automated a manual **SQL** billing workflow with **Python, PySpark**, and **AWS Glue**, processing **20+ TB** of production insurance data for **700+** member companies.
- Profiled **160+** Oracle/Impala tables with **Python, Pandas, SQL**, and JDBC to map source-system similarities and define **25** MDM domains for cloud ETL migration.
- Built ETL validation, reverse-ETL, and custom **AWS IAM** access patterns across **S3** and MDM workflows, improving controlled data access and reducing recurring manual operations.

Software Engineering Intern

American Association of Insurance Services

May 2023 – May 2024

Lisle, IL

- Engineered **Python**/JSON backend automation generating **1,000+** production **SQL** tables across **Oracle/PostgreSQL**, supporting standardized data models across **10+** insurance lines.
- Built **Python/Pandas** workflows with multiprocessing, fuzzy matching, and hashing to clean large CSV datasets for production data-standardization pipelines.
- Contributed to a **React/Node.js** modernization by implementing **RBAC** and **JWT** patterns, replacing broad employee-wide access with role-specific controls for roughly **110** internal users.
- Automated event-driven database validation with **AWS Lambda** triggers that tokenized PII using **hashlib/boto3** and ingested structured JSON into **S3**.

Software Engineering Intern

Alliance for Paired Kidney Donation

May 2022 – Aug. 2022

Toledo, OH

- Secured an **AWS-hosted Lucee/CFML** healthcare workflow platform with global **anti-CSRF** protection, IP-aware audit logging, and access-denied/404 routing across form-heavy internal workflows.
- Modernized HTML5 date/time inputs, logistics defaults, Matchgrid import ordering, MFI upload paths, and duplicate-antigen crash handling to improve data-entry reliability for internal operations.

PROJECTS

RocketGrader | *Angular, TypeScript, Express, MongoDB, Auth0, AWS S3*: Built a full-stack AI feedback platform with REST APIs, role-based dashboards, file upload/storage, PDF/DOCX/HTML parsing, and LangChain/Mistral AI grading workflows.

Travel Health Advisor | *React, Express, MongoDB, Mistral AI*: Built a health AI app with interactive country maps, disease-risk APIs, health-profile context, AI chat, and downloadable vaccine-checklist PDFs.

HealthTrend Data Pipeline | *Kafka, Hadoop HDFS, Spark, PySpark, Docker*: Built a containerized healthcare data pipeline routing CSV patient records and JSON health events into batch and streaming processing paths.

Diff-Grounded PR Generation | *Python, OpenAI API, GitHub API*: Built an LLM pipeline generating evidence-grounded PR descriptions from commits, diffs, linked issues, and metadata with automated evaluation against code-change evidence.

TECHNICAL SKILLS

Languages: Python, TypeScript/JavaScript, SQL, C++, C#, C, Lucee/CFML

Full-Stack & APIs: React, Next.js, Angular, Node.js, Express, REST APIs, PostgreSQL, MongoDB, Oracle, Drizzle ORM

Cloud, Data & Events: AWS Glue, Lambda, S3, IAM, PySpark, Pandas, Kafka, ETL, data validation, Docker, Git, Linux

Security & AI Tools: SSO, JWT, RBAC, Auth0, anti-CSRF, audit logging, PII tokenization, Codex, Claude Code, OpenAI API, Mistral AI, LangChain
