PROFESSIONAL SUMMARY

New-graduate software engineer with hands-on backend, full-stack, data, and systems experience across **Python, TypeScript, C++, SQL, React, Next.js, Node.js, PostgreSQL, MongoDB, Docker**, and **AWS**. Built working products, production automation, secure internal tools, and performance-focused systems projects with emphasis on debugging, clean implementation, and owning features from design through delivery.

EDUCATION

Bowling Green State University

Master of Science in Computer Science, GPA: 4.00/4.00

Bowling Green, OH
Aug. 2024 – Aug. 2026

Bowling Green State University

Bachelor of Science in Computer Science, GPA: 4.00/4.00

Bowling Green, OH
Jan. 2021 – Apr. 2024

EXPERIENCE

Artificial Intelligence & Computer Science Intern

SmartSolve Industries

May 2026 – Present

Bowling Green, OH

- Built secure internal software with **Next.js, TypeScript, PostgreSQL, Drizzle ORM, SSO**, and auth middleware for onboarding and org-chart workflows around sensitive employee data.
- Created a cross-platform **Docker** devcontainer for **WSL2/Colima**, reducing setup friction and standardizing reproducible environments for AI-assisted development and code review.
- Applied **Codex** and **Claude Code** to implementation planning, debugging, and self-review while keeping proprietary-code isolation and human review central.

Data Engineering Intern

American Association of Insurance Services

May 2025 – Aug. 2025

Lisle, IL

- Automated a fully manual **SQL** billing workflow with **Python, PySpark**, and **AWS Glue**, processing **20+ TB** of production insurance data for **700+** member companies.
- Built validation, reverse-ETL, and custom **AWS IAM** access patterns across **S3** and MDM workflows, improving controlled data access and reducing recurring manual operations.

Software Engineering Intern

American Association of Insurance Services

May 2023 – May 2024

Lisle, IL

- Engineered **Python**/JSON backend automation that generated **1,000+** production **SQL** tables across **Oracle/PostgreSQL**, supporting standardized data models across **10+** insurance lines.
- Built **Python/Pandas** workflows with multiprocessing, fuzzy matching, and hashing to clean large CSV datasets for production data-standardization pipelines.
- Contributed to a **React/Node.js** modernization by implementing **RBAC** and **JWT** patterns, replacing broad employee-wide access with role-specific controls for roughly **110** internal users.
- Automated database validation with **AWS Lambda** triggers that tokenized PII using **hashlib/boto3** and ingested structured JSON into **S3** for downstream workflows.

Software Engineering Intern

Alliance for Paired Kidney Donation

May 2022 – Aug. 2022

Toledo, OH

- Secured an **AWS-hosted Lucee/CFML** healthcare workflow platform with global **anti-CSRF** protection, IP-aware audit logging, and access-denied/404 routing across form-heavy internal workflows.
- Debugged and triaged **4** reliability issue classes across import ordering, MFI upload paths, duplicate-antigen page crashes, modal/tab screens, HTML5 forms, JavaScript fallbacks, and CSS updates.

PROJECTS

RocketGrader | *Angular, TypeScript, Express, MongoDB, Auth0, AWS S3*: Built a full-stack platform with teacher/student dashboards, REST APIs, role-based auth, file upload/storage, and AI feedback workflows.

Travel Health Advisor | *React, Express, MongoDB, Mistral AI*: Built a hackathon health app with interactive country maps, disease-risk APIs, health-profile context, AI chat, and downloadable vaccine checklists.

HealthTrend | *NiFi, Kafka, Hadoop HDFS, Spark, PySpark, Docker*: Built a containerized healthcare data pipeline routing CSV patient data and JSON IoT health events into batch and streaming processing paths.

Self-Adaptive Parallelism | *C++, OpenMP, Python, Docker, Linux*: Built a runtime experiment using telemetry, scheduling algorithms, UCB optimization, and benchmarks across Mandelbrot, heat diffusion, and reduction workloads.

Diff-Grounded PR Description Generation | *Python, OpenAI API, GitHub API*: Built an LLM pipeline generating evidence-grounded PR descriptions from commits, diffs, linked issues, and repository metadata.

TECHNICAL SKILLS

Languages: Python, TypeScript/JavaScript, C++, C#, SQL, C, Lucee/CFML

Frontend & Backend: React, Next.js, Angular, Node.js, Express, REST APIs, PostgreSQL, MongoDB, Oracle, Drizzle ORM

Cloud, DevOps & Data: Docker, devcontainers, Git, Linux, AWS Glue, Lambda, S3, IAM, PySpark, Pandas, CI/CD concepts

Fundamentals: data structures, algorithms, debugging, object-oriented design, auth/RBAC/JWT, runtime instrumentation, testing mindset
