PROFESSIONAL SUMMARY

Software engineering intern candidate with applied AI, full-stack, backend, data, and systems experience across **Python**, **TypeScript**, **React**, **Next.js**, **Node.js**, **PostgreSQL**, **MongoDB**, **Docker**, and **AWS**. Built AI-powered products, secure internal tools, API/data workflows, and reliability fixes with emphasis on clean code, debugging, scalable systems, and shipping useful software.

EDUCATION

Bowling Green State University
Master of Science in Computer Science, GPA: 4.00/4.00

Bowling Green, OH
Aug. 2024 – Aug. 2026

Bowling Green State University
Bachelor of Science in Computer Science, GPA: 4.00/4.00

Bowling Green, OH
Jan. 2021 – Apr. 2024

EXPERIENCE

Artificial Intelligence & Computer Science Intern

May 2026 – Present

SmartSolve Industries

Bowling Green, OH

- Built secure internal software with **Next.js**, **TypeScript**, **PostgreSQL**, **Drizzle ORM**, **SSO**, and auth middleware for onboarding and org-chart workflows around sensitive employee data.
- Created a cross-platform **Docker** devcontainer for **WSL2/Colima**, reducing setup friction and standardizing reproducible environments for AI-assisted development and code review.
- Applied **Codex** and **Claude Code** to implementation planning, debugging, and self-review while keeping proprietary-code isolation and human review central.

Data Engineering Intern

May 2025 – Aug. 2025

American Association of Insurance Services

Lisle, IL

- Automated a fully manual **SQL** billing workflow with **Python**, **PySpark**, and **AWS Glue**, processing **20+ TB** of production insurance data for **700+** member companies.
- Built validation, reverse-ETL, and custom **AWS IAM** access patterns across **S3** and MDM workflows, improving controlled data access and reducing recurring manual operations.

Software Engineering Intern

May 2023 – May 2024

American Association of Insurance Services

Lisle, IL

- Engineered **Python**/JSON backend automation that generated **1,000+** production **SQL** tables across **Oracle/PostgreSQL**, supporting standardized data models across **10+** insurance lines.
- Built **Python/Pandas** workflows with multiprocessing, fuzzy matching, and hashing to clean large CSV datasets for production data-standardization pipelines.
- Contributed to a **React/Node.js** modernization by implementing **RBAC** and **JWT** patterns, replacing broad employee-wide access with role-specific controls for roughly **110** internal users.
- Automated database validation with **AWS Lambda** triggers that tokenized PII using **hashlib/boto3** and ingested structured JSON into **S3** for downstream workflows.

Software Engineering Intern

May 2022 – Aug. 2022

Alliance for Paired Kidney Donation

Toledo, OH

- Secured an **AWS-hosted Lucee/CFML** healthcare workflow platform with global **anti-CSRF** protection, IP-aware audit logging, and access-denied/404 routing across form-heavy internal workflows.
- Debugged and triaged **4** reliability issue classes across import ordering, MFI upload paths, duplicate-antigen page crashes, modal/tab screens, HTML5 forms, JavaScript fallbacks, and CSS updates.

PROJECTS

DreamScape | *React Native, Expo, TypeScript, Gemini API, ElevenLabs API*: Built an AI mobile app with document summarization, generated quizzes, text-to-speech learning cues, cached audio playback, cue scheduling, and local-first session tracking.

RocketGrader | *Angular, TypeScript, Express, MongoDB, Auth0, AWS S3*: Built a full-stack platform with teacher/student dashboards, REST APIs, role-based auth, file upload/storage, and AI feedback workflows.

HealthTrend | *NiFi, Kafka, Hadoop HDFS, Spark, PySpark, Docker*: Built a containerized healthcare data pipeline routing CSV patient data and JSON IoT health events into batch and streaming processing paths.

Travel Health Advisor | *React, Express, MongoDB, Mistral AI*: Built a hackathon health app with interactive country maps, disease-risk APIs, health-profile context, AI chat, and downloadable vaccine checklists.

Diff-Grounded PR Description Generation | *Python, OpenAI API, GitHub API*: Built an LLM pipeline generating evidence-grounded PR descriptions from commits, diffs, linked issues, and repository metadata.

TECHNICAL SKILLS

Languages: Python, TypeScript/JavaScript, C++, C#, SQL, C, Lucee/CFML

Full-Stack & APIs: React, Next.js, Angular, Node.js, Express, REST APIs, PostgreSQL, MongoDB, Oracle, Drizzle ORM

AI, Cloud & Data: Codex, Claude Code, OpenAI API, Gemini API, ElevenLabs API, AWS Glue, Lambda, S3, IAM, PySpark, Kafka

Systems & Reliability: Docker, devcontainers, Git, Linux, data structures, algorithms, distributed systems fundamentals, auth/RBAC/JWT, testing mindset
