PROFESSIONAL SUMMARY

Data engineer and software engineer with insurance-domain experience building **Python**, **SQL**, **PySpark**, and **AWS** data pipelines across production AAIS systems. Built data validation, MDM migration, access-controlled S3 workflows, and distributed data projects that support analytics, ML/AI-ready data assets, and reproducible technical handoffs.

EDUCATION

Bowling Green State University

Master of Science in Computer Science, GPA: 4.00/4.00

Bowling Green, OH

Aug. 2024 – Aug. 2026

Bowling Green State University

Bachelor of Science in Computer Science, GPA: 4.00/4.00

Bowling Green, OH

Jan. 2021 – Apr. 2024

EXPERIENCE

Artificial Intelligence & Computer Science Intern

SmartSolve Industries

May 2026 – Present

Bowling Green, OH

- Built secure internal software with **Next.js**, **PostgreSQL**, **Drizzle ORM**, **SSO**, and auth middleware, consolidating onboarding tracking and org-chart update workflows around sensitive employee data.
- Created a cross-platform **Docker** devcontainer for **WSL2/Colima**, reducing setup friction and standardizing a reproducible environment for AI-assisted internal software development.

Data Engineering Intern

American Association of Insurance Services

May 2025 – Aug. 2025

Lisle, IL

- Automated a fully manual SQL billing workflow with **Python**, **PySpark**, and **AWS Glue**, processing **20+ TB** of golden-table insurance data for **700+ member companies** while removing recurring manual execution.
- Profiled **Oracle/Impala/PostgreSQL** data through **JDBC** with **Python**, **Pandas**, and **SQL**, mapping **160+** source tables into **25** MDM domains for standardized insurance data assets.
- Replaced **160+ Pentaho jobs** with **AWS Glue ETL** and partitioned **S3** pipelines for **Semarchy MDM**, improving maintainability and standardizing cloud data movement across complex source systems.
- Built reverse-ETL, validation, and custom **AWS IAM** access patterns to support controlled self-service data access and **24-hour** data latency across MDM workflows.

Software Engineering Intern

American Association of Insurance Services

May 2023 – May 2024

Lisle, IL

- Generated **1,000+** production SQL tables across **Oracle/PostgreSQL** with **Python/JSON** workflows, supporting standardized insurance data models across **10+** lines of business.
- Built **Python/Pandas** data-processing workflows with multiprocessing, fuzzy matching, and hashing to clean CSV datasets used in insurance data-standardization pipelines.
- Implemented **RBAC** and **JWT** patterns in a **React/Node.js** modernization effort, replacing broad employee-wide access with role-specific controls for roughly **110** internal users.
- Automated database validation with **AWS Lambda** triggers that tokenized PII using **hashlib/boto3** and ingested structured JSON into **S3** for downstream standardization workflows.

Software Engineering Intern

Alliance for Paired Kidney Donation

May 2022 – Aug. 2022

Toledo, OH

- Secured an **AWS-hosted Lucee/CFML** healthcare workflow platform with global **anti-CSRF** protection, IP-aware audit logging, and access-denied/404 routing across form-heavy internal workflows.
- Triaged **4** classes of reliability issues across import ordering, MFI upload paths, duplicate-antigen page crashes, and reusable modal/tab screens to stabilize internal operations workflows.

PROJECTS

HealthTrend | *Apache NiFi, Kafka, Hadoop HDFS, Spark, PySpark, Docker*: Built a Dockerized healthcare data pipeline routing CSV patient records into HDFS and JSON IoT health events into Kafka, then processing both sources with Spark/PySpark for validation and downstream analytics.

Diff-Grounded PR Description Generation | *Python, OpenAI API, GitHub API, LLM Evaluation*: Built an LLM research pipeline that generated evidence-grounded pull request descriptions from commits, file diffs, linked issues, and repository metadata, with automated evaluation against raw code-change evidence.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript/TypeScript, C++/C, C#, Lucee/CFML

Cloud & Data: AWS Glue, Glue Workflows, S3, Lambda, IAM, PySpark, Spark, Hadoop HDFS, Kafka, ETL, reverse ETL

Data Quality & Modeling: data validation, metadata/MDM, Semarchy xDM, JDBC, JSON, CSV, Pandas, fuzzy matching, hashing

Databases, Web & Tools: Oracle, PostgreSQL, Impala, MongoDB, React, Next.js, Node.js, Docker, Git, Linux
