PROFESSIONAL SUMMARY

Software engineer with backend, full-stack, and systems experience across **Python, C++, C#, SQL, TypeScript, Node.js, REST APIs, Docker**, and production reliability. Built secure tools, backend automation, RBAC/JWT controls, AWS workflows, and C++/OpenMP systems projects for scalable architecture, debugging, and engineering productivity.

EDUCATION

Bowling Green State University

Master of Science in Computer Science, GPA: 4.00/4.00

Bowling Green, OH

Aug. 2024 – Aug. 2026

Bowling Green State University

Bachelor of Science in Computer Science, GPA: 4.00/4.00

Bowling Green, OH

Jan. 2021 – Apr. 2024

EXPERIENCE

Artificial Intelligence & Computer Science Intern

SmartSolve Industries

May 2026 – Present

Bowling Green, OH

- Built secure internal software with **Next.js, TypeScript, PostgreSQL, Drizzle ORM, SSO**, and auth middleware for onboarding and org-chart workflows around sensitive employee data.
- Created a cross-platform **Docker** devcontainer for **WSL2/Colima**, reducing setup friction and standardizing a reproducible environment for AI-assisted software development and code review.
- Applied **Codex** and **Claude Code** to implementation planning, debugging, and self-review workflows, improving engineering productivity while keeping proprietary-code isolation and human review central.

Data Engineering Intern

American Association of Insurance Services

May 2025 – Aug. 2025

Lisle, IL

- Automated a fully manual **SQL** billing workflow with **Python, PySpark**, and **AWS Glue**, processing **20+ TB** of production insurance data for **700+** member companies.
- Built validation, reverse-ETL, and custom **AWS IAM** access patterns across **S3** and MDM workflows, improving controlled data access and reducing recurring manual operations.

Software Engineering Intern

American Association of Insurance Services

May 2023 – May 2024

Lisle, IL

- Engineered **Python**/JSON backend automation that generated **1,000+** production **SQL** tables across **Oracle/PostgreSQL**, supporting standardized data models across **10+** insurance lines.
- Built **Python/Pandas** workflows with multiprocessing, fuzzy matching, and hashing to clean large CSV datasets for production data-standardization pipelines.
- Contributed to a **React/Node.js** modernization by implementing **RBAC** and **JWT** patterns, replacing broad employee-wide access with role-specific controls for roughly **110** internal users.
- Automated database validation with **AWS Lambda** triggers that tokenized PII using **hashlib/boto3** and ingested structured JSON into **S3** for downstream workflows.

Software Engineering Intern

Alliance for Paired Kidney Donation

May 2022 – Aug. 2022

Toledo, OH

- Secured an **AWS-hosted Lucee/CFML** workflow platform with global **anti-CSRF** protection, IP-aware audit logging, and access-denied/404 routing across form-heavy internal workflows.
- Modernized legacy form workflows with **HTML5** inputs, JavaScript fallbacks, themed CSS, and **CFML** updates to improve data-entry reliability.
- Debugged and triaged **4** classes of reliability issues across import ordering, MFI upload paths, duplicate-antigen page crashes, and reusable modal/tab screens to stabilize internal operations workflows.

PROJECTS

RocketGrader | *Angular, TypeScript, Express, MongoDB, Auth0, AWS S3*: Built a full-stack platform with teacher/student dashboards, **REST APIs**, role-based auth, file upload/storage, and AI feedback workflows.

Self-Adaptive Parallelism | *C++, OpenMP, Python, Docker, Linux*: Built a C++/OpenMP runtime system using telemetry, scheduling algorithms, UCB optimization, and performance benchmarks.

Diff-Grounded PR Description Generation | *Python, GitHub API, OpenAI API*: Built an engineering-productivity pipeline generating PR descriptions from commits, diffs, linked issues, and repository metadata.

TECHNICAL SKILLS

Languages: Python, C++, C#, SQL, TypeScript/JavaScript, C, Lucee/CFML

Backend, APIs & Auth: Node.js, Express, REST APIs, PostgreSQL, MySQL, Oracle, MongoDB, JWT, RBAC, SSO, auth middleware

Systems & DevOps: Docker, Docker Compose, devcontainers, Git, Linux, Make, AWS Lambda, S3, IAM, AWS Glue, deployment-aware workflows

Core CS: object-oriented design, data structures, algorithms, complexity analysis, distributed systems, debugging, runtime instrumentation
