EDUCATION

Bowling Green State University

Master of Science in Computer Science, **GPA: 4.00/4.00**

Bowling Green, OH

Aug. 2024 – Aug. 2026

Bowling Green State University

Bachelor of Science in Computer Science, **GPA: 4.00/4.00**

Bowling Green, OH

Jan. 2021 – Apr. 2024

EXPERIENCE

Artificial Intelligence & Computer Science Intern

May 2026 – Present

SmartSolve Industries

Bowling Green, OH

- Drive an **AI-first workflow** with agentic CLIs (**Claude Code**, **Codex**) as daily drivers to architect, ship, and self-review production features.
- Architected a full-stack **Next.js** onboarding tracker on a **Postgres/Drizzle ORM** backend, using **SSO** and **auth middleware** to protect sensitive new-hire data, cutting HR's manual tracking time and auto-updating the org chart.
- Proactively built a cross-platform **Docker** devcontainer (**WSL2/Colima**) isolating **AI agents** to safeguard **proprietary data**.

Data Engineering Intern

May 2025 – Aug. 2025

American Association of Insurance Services

Lisle, IL

- Automated a 100% manual SQL billing script by developing a **PySpark** job and weekly **AWS Glue Workflow**, processing **20+ TB** of **Impala** data to calculate charges for **700+ member companies**.
- Architected the 160+ table migration by profiling **Oracle/Impala** (via **JDBC**) with **Python (Pandas)** and **SQL** to map **data similarities** and define a **single data taxonomy** of **25 MDM domains**.
- Replaced **160+ Pentaho jobs** with an automated **AWS Glue Workflow**, using the new **MDM domains** and an **AWS Glue pipeline** to ETL data into **S3** (partitioned) for **Semarchy MDM**.
- Orchestrated daily **AWS Glue Workflows** (incl. a **reverse-ETL** pipeline) to **enable a new self-service application**, eliminating manual entry and ensuring **24-hour data latency** across all MDM domains.

Software Engineering Intern

May 2023 – May 2024

American Association of Insurance Services

Lisle, IL

- Engineered the **foundational data model** for **openIDL** (unified insurance-data view), using **Python** to parse taxonomies into **1,000s of SQL tables** on **Oracle/PostgreSQL** across **10+ insurance lines**.
- Built **Python/Pandas** data-processing workflows with multiprocessing, fuzzy matching, and hashing to clean large CSV datasets for insurance data-standardization pipelines.
- Contributed to a full-stack **React** modernization, implementing **RBAC** and **JWT auth** with **Node.js** for a secure, role-specific landing page serving 100+ internal users.
- Automated a 2-person validation process by building a **scheduled AWS Lambda** function that polled database tables, **tokenized PII** using **hashlib/boto3**, and ingested clean **JSON** into S3.

Software Engineering Intern

May 2022 – Aug. 2022

Alliance for Paired Kidney Donation

Toledo, OH

- Ensured **HIPAA compliance** via site-wide **anti-CSRF tokens** securing user sessions and patient data.
- Built a **JS/Bootstrap** module to log blood sample data, ensuring data completeness for the matching algorithm.
- Redesigned the responsive **“Match Run”** page (**Bootstrap**) and refactored legacy **JS** to **async/defer** loading for faster donor-chain rendering.

PROJECTS

Travel Health Advisor | *React, Node.js (Express), MongoDB, Mistral AI, TailwindCSS*

Apr. 2025

- Developed a full-stack health app using **React**, **TailwindCSS**, and **Express.js** to provide personalized travel health advisories (e.g., disease risk, precautions) based on user health data and destination.
- Built a **Mistral AI** chatbot and dynamic travel checklist workflow using user health-profile context, disease-risk data, and country-specific vaccine recommendations.

Diff-Grounded PR Description Generation | *Python, OpenAI API, GitHub API, LLM Evaluation*

2026

- Built an LLM research pipeline that generated evidence-grounded GitHub pull request descriptions from commits, file diffs, linked issues, and repository metadata.
- Developed structured PR-context construction, grounding-constrained generation, and automated LLM evaluation workflows that improved correctness, coverage, and clarity over baseline descriptions.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript/TypeScript, C++/C, C#, PHP

AI-First & Agentic: Claude Code, Codex, LangChain, RAG, Mistral AI, HuggingFace, PyTorch, TensorFlow

Data Engineering: AWS (Glue, S3, Lambda), Spark (PySpark), Impala, Hadoop (HDFS, MapReduce), Semarchy xDM

Web & Frameworks: React, Next.js, Angular, Node.js, Pandas, NumPy, TailwindCSS

Databases & Tools: PostgreSQL, Oracle, MongoDB, MySQL, Drizzle ORM, Git, Docker, Vercel
