PROFESSIONAL SUMMARY

Software engineer with full-stack, applied AI, cloud data, and security-aware platform experience across TypeScript, Python, React/Next.js, Node.js, SQL, Docker, AWS, LLM APIs, and developer tooling. Built internal tools, AI workflows, data pipelines, secure access controls, and healthcare/insurance systems with production-oriented reliability and defensible technical depth.

EDUCATION

Bowling Green State University

M.S. in Computer Science, GPA: 4.00/4.00

Bowling Green, OH

Aug. 2024 – Aug. 2026

Bowling Green State University

B.S. in Computer Science, GPA: 4.00/4.00

Bowling Green, OH

Jan. 2021 – Apr. 2024

EXPERIENCE

Artificial Intelligence & Computer Science Intern

May 2026 – Present

SmartSolve Industries

Bowling Green, OH

- Architected a full-stack onboarding tracker with Next.js, TypeScript, PostgreSQL, Drizzle ORM, SSO, and auth middleware, centralizing new-hire workflows while protecting sensitive employee data.
- Scoped an AI-enabled QMS dependency register by modeling relationships among quality-management documents, translating ambiguous operational needs into a reviewable implementation plan.
- Built a Docker devcontainer for WSL2 and Colima, standardizing cross-platform setup and isolating AI-assisted development workflows around proprietary source code.

Data Engineering Intern

May 2025 – Aug. 2025

American Association of Insurance Services

Lisle, IL

- Automated a manual SQL billing workflow with Python, PySpark, and AWS Glue, processing 20+ TB of production insurance data to calculate charges for 700+ member companies.
- Profiled 160+ MySQL, Oracle, and Impala tables with Python, Pandas, SQL, and JDBC, mapping source-system relationships into a 25-domain taxonomy for maintainable migration.
- Replaced 160+ legacy Pentaho jobs with AWS Glue ETL workflows and partitioned S3 pipelines for Semarchy MDM, improving maintainability and standardizing cloud data movement.

Software Engineering Intern

May 2023 – May 2024

American Association of Insurance Services

Lisle, IL

- Engineered Python/JSON automation that generated 1,000+ production SQL tables across MySQL, Oracle, PostgreSQL, and 10+ insurance lines, scaling standardized data-model delivery.
- Implemented RBAC and JWT patterns in a React/Node.js modernization, replacing broad internal access with role-specific controls for about 110 users.
- Automated AWS Lambda validation that tokenized PII with hashlib/boto3 and delivered structured JSON to S3, strengthening secure downstream data processing.

Software Engineering Intern

May 2022 – Aug. 2022

Alliance for Paired Kidney Donation

Toledo, OH

- Stabilized an AWS-hosted Lucee/CFML healthcare platform with anti-CSRF protection, IP-aware audit logging, access routing, import-ordering fixes, data-entry safeguards, and duplicate-antigen crash handling.

PROJECTS

Diff-Grounded PR Description Generation

Python, OpenAI API, GitHub API

- Built an ICSME-published LLM pipeline that generated evidence-grounded pull request descriptions from commits, diffs, linked issues, and repository metadata, then evaluated outputs against raw code-change evidence.

Fix-It-Flow - Voice-First Repair PWA

Next.js, TypeScript, Gemini, DynamoDB

- Built a stateful AI workflow with typed Next.js API routes, camera input, voice commands, Gemini Vision, Featherless.AI/Llama reasoning, ElevenLabs TTS, and DynamoDB session persistence.
- Designed repair guidance with structured findings, confidence scores, requested camera views, safety warnings, contextual Q&A, and voice controls for next, repeat, help, and end session.

RocketGrader - AI Assignment Feedback Platform

Angular, TypeScript, Express, MongoDB

- Built a full-stack platform with Angular, TypeScript, Node.js/Express, MongoDB, Auth0, AWS S3, role-based dashboards, file upload/storage, and AI-assisted grading workflows.

TECHNICAL SKILLS

Languages & Product: Python, TypeScript/JavaScript, SQL, C++, C, C#, React, Next.js, Angular, Node.js, Express, REST APIs

AI, Data & Cloud: OpenAI API, Gemini API, Mistral AI, LangChain, RAG, LLM evaluation, PostgreSQL, MySQL, MongoDB, AWS Glue, S3, Lambda, IAM, DynamoDB, PySpark

Security & Tools: Docker, Docker Compose, Git, Linux, WSL2, Colima, SSO, JWT, RBAC, Auth0, anti-CSRF, audit logging, PII tokenization, Codex, Claude Code
