PROFESSIONAL SUMMARY

Software engineer with experience building reliable, testable, and maintainable applications, secure internal tools, APIs, and AI-assisted products using **Python, JavaScript/TypeScript, C++, C#, React, Angular, Node.js, PostgreSQL, MongoDB, Docker**, and **AWS**. Background spans debugging, code review, cloud automation, web security, and production workflow reliability.

EDUCATION

Bowling Green State University

Master of Science in Computer Science, GPA: 4.00/4.00

Bowling Green, OH

Aug. 2024 – Aug. 2026

Bowling Green State University

Bachelor of Science in Computer Science, GPA: 4.00/4.00

Bowling Green, OH

Jan. 2021 – Apr. 2024

EXPERIENCE

Artificial Intelligence & Computer Science Intern

SmartSolve Industries

May 2026 – Present

Bowling Green, OH

- Built secure internal software with **Next.js, TypeScript, PostgreSQL, Drizzle ORM, SSO**, and auth middleware for onboarding, org-chart, and sensitive employee-data workflows.
- Created a cross-platform **Docker** devcontainer for **WSL2/Colima**, improving reproducible setup, debugging, developer workflow consistency, and AI-assisted code review.
- Applied **Codex** and **Claude Code** to design planning, implementation, debugging, and self-review while keeping proprietary-code isolation and human validation central.

Data Engineering Intern

American Association of Insurance Services

May 2025 – Aug. 2025

Lisle, IL

- Automated a manual **MySQL/SQL** billing workflow with **Python, PySpark**, and **AWS Glue**, processing **20+ TB** of production insurance data for **700+** member companies.
- Profiled **160+** **MySQL/Oracle/Impala** tables with **Python, Pandas, SQL**, and **JDBC** to map source-system similarities and define **25** MDM domains for cloud ETL migration.
- Built ETL validation, reverse-ETL, and custom **AWS IAM** access patterns across **S3** and MDM workflows, improving controlled data access and reducing recurring manual operations.

Software Engineering Intern

American Association of Insurance Services

May 2023 – May 2024

Lisle, IL

- Engineered **Python/JSON** backend automation generating **1,000+** production **SQL** tables across **MySQL, Oracle**, and **PostgreSQL**, supporting standardized data models across **10+** insurance lines.
- Contributed to a **React/Node.js** modernization by implementing **RBAC** and **JWT** patterns, replacing broad employee-wide access with role-specific controls for roughly **110** internal users.
- Automated event-driven database validation with **AWS Lambda** triggers that tokenized PII using **hashlib/boto3** and ingested structured JSON into **S3**.

Software Engineering Intern

Alliance for Paired Kidney Donation

May 2022 – Aug. 2022

Toledo, OH

- Secured an **AWS-hosted Lucee/CFML** healthcare workflow platform with global **anti-CSRF** protection, IP-aware audit logging, and access-denied/404 routing across internal workflows.
- Modernized **HTML5** date/time inputs, themed **JavaScript/CSS** fallbacks, **Matchgrid** import ordering, **MFI** upload paths, and duplicate-antigen crash handling to improve data-entry reliability.

PROJECTS

RocketGrader | *Angular, TypeScript, Express, MongoDB, Auth0, AWS S3*: Built a full-stack AI feedback platform with REST APIs, role-based dashboards, file upload/storage, parsing, and LangChain/Mistral AI grading workflows.

Travel Health Advisor | *React, Vite, Express, MongoDB, Mistral AI*: Built a user-facing health AI app with interactive country maps, disease-risk APIs, health-profile context, AI chat, and downloadable vaccine-checklist PDFs.

Self-Adaptive Parallelism | *C++, OpenMP, Python, Docker, Linux*: Built a runtime research system using per-epoch telemetry and a UCB controller to tune scheduling policy, chunk size, and thread count.

Diff-Grounded PR Generation | *Python, OpenAI API, GitHub API*: Built an LLM pipeline generating evidence-grounded PR descriptions from commits, diffs, linked issues, and metadata with automated evaluation.

TECHNICAL SKILLS

Languages: Python, JavaScript/TypeScript, C++, C#, SQL, PHP, C, Lucee/CFML

Web & APIs: React, Angular, Next.js, Node.js, Express, REST APIs, HTML5, CSS, Bootstrap, TailwindCSS

Data, Cloud & DevOps: PostgreSQL, MySQL, MongoDB, Oracle, AWS Glue, Lambda, S3, IAM, PySpark, Docker, Git, Linux

Quality, Security & AI: debugging, code review, JWT, RBAC, SSO, Auth0, anti-CSRF, audit logging, Codex, Claude Code, Mistral AI, LangChain
