PROFESSIONAL SUMMARY

AI-first software engineer and CS graduate student with experience using **Codex** and **Claude Code** for planning, debugging, implementation, and code review while validating generated output. Built **TypeScript/Python** applications, APIs, databases, AI-enabled workflows, Docker environments, RAG systems, and cloud/data automation with a focus on maintainable, production-minded software.

EDUCATION

Bowling Green State University

Master of Science in Computer Science, GPA: 4.00/4.00

Bowling Green, OH

Aug. 2024 – Aug. 2026

Bowling Green State University

Bachelor of Science in Computer Science, GPA: 4.00/4.00

Bowling Green, OH

Jan. 2021 – Apr. 2024

EXPERIENCE

Artificial Intelligence & Computer Science Intern

SmartSolve Industries

May 2026 – Present

Bowling Green, OH

- Applied **Codex** and **Claude Code** as AI development tools for planning, implementation, debugging, code review, and self-review while keeping human validation central around proprietary code.
- Built secure internal software with **Next.js**, **TypeScript**, **PostgreSQL**, **Drizzle ORM**, **SSO**, and auth middleware for onboarding, org-chart, and sensitive employee-data workflows.
- Created a cross-platform **Docker** devcontainer for **WSL2/Colima**, improving reproducible setup, experimentation, and developer workflow consistency for AI-assisted engineering.

Data Engineering Intern

American Association of Insurance Services

May 2025 – Aug. 2025

Lisle, IL

- Automated a manual **MySQL/SQL** billing workflow with **Python**, **PySpark**, and **AWS Glue**, processing **20+ TB** of production insurance data for **700+** member companies.
- Profiled **160+ MySQL/Oracle/Impala** tables with **Python**, **Pandas**, **SQL**, and **JDBC** to map source-system similarities and define **25** MDM domains for cloud ETL migration.

Software Engineering Intern

American Association of Insurance Services

May 2023 – May 2024

Lisle, IL

- Engineered **Python**/JSON backend automation generating **1,000+** production **SQL** tables across **MySQL**, **Oracle**, and **PostgreSQL**, supporting standardized data models across **10+** insurance lines.
- Contributed to a **React/Node.js** modernization by implementing **RBAC** and **JWT** patterns, replacing broad employee-wide access with role-specific controls for roughly **110** internal users.
- Automated event-driven database validation with **AWS Lambda** triggers that tokenized PII using **hashlib/boto3** and ingested structured JSON into **S3**.

Software Engineering Intern

Alliance for Paired Kidney Donation

May 2022 – Aug. 2022

Toledo, OH

- Secured an **AWS-hosted Lucee/CFML** healthcare workflow platform with global **anti-CSRF** protection, IP-aware audit logging, and access-denied/404 routing across internal workflows.
- Modernized **HTML5** date/time inputs, **JavaScript/CSS** fallbacks, upload paths, and duplicate-antigen crash handling to improve data-entry reliability for operational users.

PROJECTS

RocketGrader | *Angular, TypeScript, Express, MongoDB, Auth0, LangChain, Mistral AI*: Built a full-stack AI feedback platform with REST APIs, role-based dashboards, file upload/parsing, chat, and structured grading workflows.

Diff-Grounded PR Generation | *Python, OpenAI API, GitHub API*: Built an LLM pipeline generating evidence-grounded PR descriptions from commits, diffs, linked issues, and metadata, with structured context construction and automated evaluation.

FalconGraph Search | *Python, Flask, OpenAI API, RAG, React, Next.js*: Built a source-grounded search prototype with document ingestion, chunking, vector retrieval, semantic search, LLM answers, and graph-based source tracing.

Travel Health Advisor | *React, Vite, Express, MongoDB, Mistral AI*: Built a health AI prototype with country-specific disease APIs, saved health-profile context, chatbot answers, and vaccination-checklist PDFs.

DreamScape | *React Native, Expo, TypeScript, Gemini API, ElevenLabs API*: Built a mobile AI learning app with document summarization, generated quizzes, text-to-speech cues, cached audio, and local-first session tracking.

TECHNICAL SKILLS

Languages: TypeScript/JavaScript, Python, SQL, C++, C#, C, Lucee/CFML

AI-First Development: Codex, Claude Code, OpenAI API, Gemini API, Mistral AI, LangChain, RAG, prompt engineering, LLM inference, automated LLM evaluation, embeddings, vector search, semantic retrieval, ChromaDB, Sentence Transformers

Product, APIs & Databases: React, Next.js, Angular, Node.js, Express, Flask, REST APIs, Auth0, JWT, RBAC, SSO, PostgreSQL, MongoDB, MySQL, Drizzle ORM, Mongoose

Cloud, Data & Tools: Docker, Git, Linux, AWS Glue, Lambda, S3, IAM, PySpark, Spark, Pandas, JDBC
