PROFESSIONAL SUMMARY

Junior AI engineer and software engineer with AI-first development, LLM evaluation, full-stack TypeScript/React, Python, and cloud/data engineering experience. Built and reviewed systems with **Codex**, **Claude Code**, **Next.js**, **React**, **Python**, **OpenAI API**, **GitHub API**, **RAG**, **Docker**, **PostgreSQL**, **AWS Glue/S3/Lambda/IAM**, and **PySpark**, with emphasis on traceability, secure workflows, and human-reviewable AI outputs.

EDUCATION

Bowling Green State University

Master of Science in Computer Science, GPA: 4.00/4.00

Bowling Green, OH

Aug. 2024 – Aug. 2026

Bowling Green State University

Bachelor of Science in Computer Science, GPA: 4.00/4.00

Bowling Green, OH

Jan. 2021 – Apr. 2024

EXPERIENCE

Artificial Intelligence & Computer Science Intern

SmartSolve Industries

May 2026 – Present

Bowling Green, OH

- Applied **Codex** and **Claude Code** in AI-assisted engineering workflows for planning, implementation, debugging, and self-review while keeping human judgment and proprietary-code isolation central.
- Built a full-stack **Next.js/TypeScript** onboarding tracker with **PostgreSQL**, **Drizzle ORM**, **SSO**, and auth middleware, consolidating onboarding tracking and org-chart update workflows into a secured internal tool.
- Created a cross-platform **Docker** devcontainer for **WSL2/Colima**, reducing setup friction and standardizing a reproducible environment for AI-assisted internal software development.

Data Engineering Intern

American Association of Insurance Services

May 2025 – Aug. 2025

Lisle, IL

- Automated a fully manual SQL billing workflow with **Python**, **PySpark**, and **AWS Glue**, processing **20+ TB** of golden-table insurance data for **700+ member companies**.
- Profiled **Oracle/Impala** data through **JDBC** with **Python**, **Pandas**, and **SQL**, mapping **160+** source tables into **25** MDM domains for standardized data pipelines.
- Built reverse-ETL, validation, and custom **AWS IAM** access patterns to support controlled self-service data access and **24-hour** data latency across MDM workflows.

Software Engineering Intern

American Association of Insurance Services

May 2023 – May 2024

Lisle, IL

- Generated **1,000+** production SQL tables across **Oracle/PostgreSQL** with **Python/JSON** workflows, supporting standardized insurance data models across **10+** lines of business.
- Implemented **RBAC** and **JWT** patterns in a **React/Node.js** modernization effort, replacing broad employee-wide access with role-specific controls for roughly **110** internal users.
- Automated database validation with **AWS Lambda** triggers that tokenized PII using **hashlib/boto3** and ingested structured JSON into **S3** for downstream standardization workflows.

Software Engineering Intern

Alliance for Paired Kidney Donation

May 2022 – Aug. 2022

Toledo, OH

- Modernized an **AWS-hosted Lucee/CFML** workflow platform with global **anti-CSRF** protection, IP-aware audit logging, access-denied routing, and **HTML5/JavaScript** form updates.
- Triaged **4** classes of reliability issues across import ordering, MFI upload paths, duplicate-antigen page crashes, and reusable modal/tab screens to stabilize internal operations workflows.

PROJECTS

Diff-Grounded PR Description Generation | *Python, OpenAI API, GitHub API, LLM Evals*: Built an LLM research pipeline that generated evidence-grounded pull request descriptions from commits, file diffs, linked issues, and repository metadata, with automated evaluation against raw code-change evidence.

FalconGraph Search | *Python, Flask, OpenAI API, RAG, React, Next.js*: Built a campus knowledge-search prototype using crawled webpages, PDFs, chunking, vector retrieval, source-grounded answer generation, and graph relationships to trace answers back to original sources.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript/TypeScript, C++/C, C#, Lucee/CFML

AI & Agentic Tools: Codex, Claude Code, OpenAI API, LLM inference, prompt engineering, RAG, LLM evaluation, GitHub API

Web, APIs & Auth: React, Next.js, Node.js, Express, Flask, REST APIs, SSO, JWT, RBAC, auth middleware

Cloud, Data & Tools: AWS Glue, S3, Lambda, IAM, PySpark, Spark, PostgreSQL, Oracle, MongoDB, Docker, Git, Pandas
