

PROFESSIONAL SUMMARY

AI and automation-focused software engineer with experience building **LLM**, **RAG**, full-stack, data, and secure workflow systems using **Python**, **TypeScript**, **Next.js**, **Node.js**, **PostgreSQL**, **Docker**, and **AWS**. Built AI-assisted workflows, source-grounded generation, document/search systems, internal automation, and technical enablement materials with attention to governance, metadata, APIs, and security.

EDUCATION

Bowling Green State University <i>Master of Science in Computer Science, GPA: 4.00/4.00</i>	Bowling Green, OH <i>Aug. 2024 – Aug. 2026</i>
Bowling Green State University <i>Bachelor of Science in Computer Science, GPA: 4.00/4.00</i>	Bowling Green, OH <i>Jan. 2021 – Apr. 2024</i>

EXPERIENCE

Artificial Intelligence & Computer Science Intern <i>SmartSolve Industries</i> - Supported AI-enabled internal software planning, including a QMS dependency register for modeling relationships between quality documents and improving document traceability. - Built secure internal software with Next.js, TypeScript, PostgreSQL, Drizzle ORM, SSO, and auth middleware for onboarding and org-chart workflows around sensitive employee data. - Applied Codex and Claude Code to implementation planning, debugging, and self-review while using a Docker devcontainer to isolate AI-assisted workflows around proprietary code.	May 2026 – Present <i>Bowling Green, OH</i>
Graduate Research Assistant I <i>Bowling Green State University</i> - Developed technical training materials, lab guides, and enablement content across cybersecurity, email security, cryptography, secure key management, and NICE/CAE-CD curriculum mapping. - Led 10 undergraduate students in organizing a CyberCamp, translating security concepts into demos and hands-on activities for phishing, password security, cryptography, and cyber escape-room material.	Aug. 2024 – May 2026 <i>Bowling Green, OH</i>
Data Engineering Intern <i>American Association of Insurance Services</i> - Automated a fully manual SQL billing workflow with Python, PySpark, and AWS Glue, processing 20+ TB of production insurance data for 700+ member companies. - Built validation, reverse-ETL, and custom AWS IAM access patterns across S3 and MDM workflows, improving controlled data access and reducing recurring manual operations.	May 2025 – Aug. 2025 <i>Lisle, IL</i>
Software Engineering Intern <i>American Association of Insurance Services</i> - Engineered Python/JSON backend automation generating 1,000+ production SQL tables across Oracle/PostgreSQL, supporting standardized data models across 10+ insurance lines. - Contributed to a React/Node.js modernization by implementing RBAC and JWT patterns, replacing broad employee-wide access with role-specific controls for roughly 110 internal users. - Automated database validation with AWS Lambda triggers that tokenized PII using hashlib/boto3 and ingested structured JSON into S3 for downstream workflows.	May 2023 – May 2024 <i>Lisle, IL</i>
Software Engineering Intern <i>Alliance for Paired Kidney Donation</i> Built and stabilized Lucee/ColdFusion features for an AWS-hosted internal healthcare operations platform, adding anti-CSRF coverage, audit logging, access-denied/404 flows, date/time picker migrations, logistics defaults, and reliability fixes.	May 2022 – Aug. 2022 <i>Toledo, OH</i>

PROJECTS

FalconGraph Search | *Python, Flask, OpenAI API, RAG, React, Next.js*: Built a campus knowledge-search prototype with web/PDF ingestion, document chunking, retrieval, source-grounded answers, and graph relationships.

Diff-Grounded PR Description Generation | *Python, OpenAI API, GitHub API*: Built an LLM pipeline generating evidence-grounded PR descriptions from commits, diffs, linked issues, and metadata, with automated evaluation against code-change evidence.

RocketGrader | *Angular, TypeScript, Express, MongoDB, Auth0, AWS S3*: Built a full-stack AI feedback platform with REST APIs, role-based dashboards, file parsing, cloud storage, and LangChain/Mistral AI grading workflows.

DreamScape | *React Native, Expo, TypeScript, Gemini API, ElevenLabs API*: Built an AI mobile app with document summarization, generated quizzes, text-to-speech cues, audio caching, cue scheduling, and local-first session tracking.

TECHNICAL SKILLS

AI & Automation: Codex, Claude Code, OpenAI API, Gemini API, ElevenLabs API, LangChain, Mistral AI, RAG, prompt engineering, LLM evaluation

Software & APIs: Python, TypeScript/JavaScript, React, Next.js, Angular, Node.js, Express, REST APIs, PostgreSQL, MongoDB, Oracle

Cloud, Data & Security: AWS Glue, Lambda, S3, IAM, PySpark, Pandas, Docker, Git, Linux, SSO, JWT, RBAC, anti-CSRF, audit logging

Knowledge Systems: document chunking, metadata-aware retrieval, source-grounded generation, data modeling, technical documentation, training demos
